ABOUT NIPPON PAINT MALAYSIA

At Nippon Paint, we pride ourselves as the coating experts, specialized in coatings for multi-surfaces and multi-segments and understand that every surface has its own unique characteristics and challenges. With that in mind and with Nippon Paint's spirit in providing the best value to our customers, we now include waterproofing to further enhance the essence of the Total Coating & Construction Solutions to our customers, providing correct and quality waterproof products to increase the durability and adequate protection for every buildings.

As the trusted brand for more than 50 years, we own a dedicated and proactive sales force and specification consultant team ready to attend to all your enquiries. Our professional technical consultants are ready for any technical assistance needed in pre, during and post waterproofing construction stages.

“ *Innovation is at its peak when it is harnessed for a singular aim – the smile on our customers' face,* ”
- Yaw Seng Heng, Group MD, Nippon Paint (M) Sdn Bhd -

CONVENTIONAL COATINGS

Alkyd Primers & Galvanised Steel Primer

This category consists of single pack coatings that normally require simple surface preparation such as hand scrubbing with wire brush or mechanical power tool. It is specially formulated to provide protection against corrosion for surfaces under normal service condition exposed to an environment of light moisture condensation and presence of mild corrosive chemicals.

Nippon Paint Red Oxide Primer Nippon Paint Zinc Phosphate Primer FD

Alkyd-based fast drying rust inhibitive primer is designed for application on wire brushed/power tooled steel surfaces under non-immersion condition to prevent rust formation. It can be overcoated with most alkyd finishes and alkyd micaceous iron oxides such as Protective Finish FD and Micaceous Iron Oxide as intermediate and top coats. (Nippon Paint Zinc Phosphate Primer FD acts as a rust inhibiting primer.)

Nippon Paint Red Oxide Primer

Reddish Brown

Nippon Paint Zinc Phosphate Primer FD

Grey Green

Light Grey

Reddish Brown

Nippon Paint PVB Tech Primer

Nippon Paint PVB Tech Primer is a single-pack modified polyvinyl butyral, acid-catalysed etching primer. It is a fast-drying primer with excellent adhesion, suitable for steel, galvanised steel and light alloys.

Grey Green

Nippon Paint Micaceous Iron Oxide (MIO)

Alkyd-based coating pigmented with micaceous iron oxide. Being resistant to atmospheric pollution, high humidity and mild chemical fume attack, it gives protection to the interior and exterior of steelwork, typically in the mild marine and industrial environment. Exhibits a matt finish with a metallic lustre. It can be used as a finish topcoat on its own.

Silver

Dark Grey

Grey Black

Neptune Blue

Neon Green

Nippon Paint Protective Finish FD

Nippon Paint Protective Finish FD is a finish coating based on a combination of oil modified alkyd and a special synthetic resin. It has excellent weathering resistance and is recommended as finishing coat for steel structure and iron surfaces under non-immersion condition.

Alkyd Finish

CONVENTIONAL COATINGS

Nippon Paint Aluminium Paint

Nippon Paint Aluminium Paint is a high-quality solvent-based paint. It can be used on all types of suitably primed interior and exterior metal surfaces.

Nippon Paint Protective Acrylic Red Oxide Primer

Single pack acrylic based primer for use on steel, galvanised steel and aluminium window frames. It provides fast drying properties with excellent chemical and corrosion resistances.

Red Oxide Primer

Nippon Paint Bituminous Solution

Excellent wetting and water-resistant properties that provides an excellent finish for internal lining of water tanks.

Black

Nippon Paint Protective Acrylic Finish

Single-pack acrylic semi-gloss with good durability against exterior weathering. The detergent resistance and washable finish makes maintenance cleaning in high traffic area easy.

Tower Red 148**

White 145**

**Approved by The Civil Aviation Authority of Malaysia (Previously known as Department of Civil Aviation (DCA))

HEAVY-DUTY COATINGS

Comprehensive two-pack protective coatings specially formulated to provide protection against corrosion for surface under service condition exposed to an environment of medium to high condensation and presence of corrosive chemicals.

Nippon Paint NIOZ

Inorganic Zinc Primer – A two-pack solvent based which can be applied on commercial abrasive blasted standard (SSPC-SP 10, Sa 2.5) base coating based on ethyl silicate and zinc dust. It prevents corrosion and provides excellent resistance to weathering, abrasion, impact, heat and many solvents, making it suitable for on commercial abrasive blasted standard (SSPC-SP 10, Sa 2.5) for severe corrosive services.

Nippon Paint Zinc Rich Primer HS Nippon Paint Nippezzinc E2 Primer

Organic Zinc Rich Primers – Two-pack epoxy zinc rich primers which can be applied in commercial abrasive blasted standard (SSPC-SP10, Sa 2.5) steel for cathodic protection. Ideal as touch-up primer and can be applied by brush or roller. (Use Nippon Paint Nippezzinc E2 Primer for long term protection at marine and heavy industrial areas.)

Nippon Paint Zinc Rich Primer HS

Nippon Paint Nippezzinc E2 Primer

Nippon Paint Etching Primer 120 Nippon Paint Galvaprimer

Nippon Paint Etching Primer 120 and Nippon Paint Galvaprimer are two-pack polyvinyl butyral-based, acid-catalysed etching primers. A must for galvanised steel and light alloys before application of other topcoats. It gives excellent adhesion to galvanised steel and light alloys which provides a suitable base for most of the coatings to adhere satisfactorily. (Use Nippon Paint Etching Primer 120 for lighter finishing colours. Use Nippon Paint Galvaprimer for darker finishing colours.)

Nippon Paint Etching Primer 120

Nippon Paint Galvaprimer

Nippon Paint Penetrative Epoxy Primer

Two-pack amidoamine cured epoxy finish for use on concrete floor surfaces, which provide good adhesion to the substrate. Acid-treatment should be done prior to application. It is suitable for use as a tie coat between concrete substrate and solvent-based topcoat, such as Nippon Paint EA4 Finish and Nippon Paint EA7 Finish.

HEAVY-DUTY COATINGS

Internal Tank Epoxy Coatings

Nippon Paint EA9 Red Oxide Primer

A two-pack high-build amine adduct cured food grade epoxy primer. It can be overcoated with food grade epoxy finish, Nippon Paint EA9 Finish HB for coating of most of the edible storage tanks.

Nippon Paint EA9 Finish HB

A two-pack high-build amine-adduct cured food grade epoxy finish. It is designed as an intermediate or finishing coat for the internal coating of edible storage tanks and interior primed steel. It can be painted directly on masonry, galvanized surfaces and non-ferrous metal i.e. aluminum and light alloys. It can also be recommended as a hard, thick barrier coat which can act as a finishing for storage tank.

Executive Grey 0104

Nippon Paint Arocoat

A two-pack high-build coal tar epoxy coating, which provides excellent protection against corrosive chemicals and resistance against salt and fresh water.

Brown

Black

Immersed Epoxy Coatings

HEAVY-DUTY COATINGS

Nippon Paint 8048 Zinc Phosphate Primer QD

A two-pack high build surface/tolerant epoxy coating that combines superior barrier properties with excellent wetting, adhesive characteristics and low VOC.

Reddish

Pearl Grey

Nippon Paint 8048

Surface tolerant/mastic and low VOC, high performance advanced technology semi-gloss mastic. As a multi-purpose mastic with high volume of solids. It provides excellent corrosion protection and resistance against oil, solvents, chemicals, splashes and spillages.

Aluminium 1463

Straw Cream 1134

Marble Grey 0104

Indian Red 1462

Off White

RAL 7035

Nippon Paint 8048 MIO

Two-pack epoxy polyamide coating pigmented with micaceous iron oxide that provides a high build impervious barrier which gives excellent adhesion and surface wetting properties. It has unique combination of anti-corrosion pigments, and rust penetrants giving it excellent corrosion resistance in virtually any environment.

Light Grey

Silver

Dark Grey

HEAVY-DUTY COATINGS

Nippon Paint Epoxy Xpress Zinc Phosphate Primer

Polyamide cured epoxy coating with added zinc phosphate pigment. It is a fast-drying epoxy, which has superior adhesive properties with excellent corrosion resistance. It can be applied over wire brushed rusty steel where abrasive blasting is not possible.

Nippon Paint Epoxy Xpress

Polyamide cured epoxy with fast drying properties and high build barrier coating that gives excellent adhesion and surface wetting properties on appropriate primed steelwork. The barrier coat acts as a mid coat to provides excellent corrosion resistance

Nippon Paint Epoxy Xpress MIO

Polyamide cured coating pigmented with Micaceous Iron Oxide(MIO). Fast drying, high build barrier coating that gives excellent adhesion and surface wetting properties. The MIO further enhances the corrosion, mechanical and chemical resistance of the coating.

Nippon Paint Polyurethane Recoatable Finish

Two-pack aliphatic acrylic PU glossy finish for exterior and interior surfaces. This high-performance finish has excellent resistance to abrasion, scratches, impact, condensing humidity, staining and splashes of chemicals. Nippon Paint Polyurethane Recoatable Finish is ideal for heavy-duty industrial areas where protection of the surfaces are important.

▲ Signal Green RAL 6032

BS9102 White and BS9103 Black are also available.

▲ Signal Colours

Nippon Paint PUR Lite Finish

A two component PU coating for all your basic metal surfaces protection. This good performance glossy finishing provides good impact and chemical resistance. Nippon Paint PUR Lite Finish provides ideal protection for medium-duty areas.

NOTE: Colour selection is the same as Nippon Paint Polyurethane Recoatable Finish

HEAVY-DUTY COATINGS

Nippon Paint EA4 Finish Nippon Paint EA4 Finish (EP)

Two-pack amine adduct cured epoxy finish with hard-wearing, chemical-resistant and excellent abrasion resistance for steel structures. The glossy and smooth finish is suitable for use in areas subjected to high level of abuse and aggressive chemicals with ease of maintenance and cleaning. Use Nippon EA4 Finish (EP) with EP Hardener when overcoat on Nippon Paint 8048 products.

BS9102 White and BS9103 Black are also available.
*Premium Colours

Nippon Paint EA7 Finish

A good performance two pack amine adduct cured epoxy coating that gives a glossy finishing appearance. This finishing makes it suitable for concrete substrates where abrasion resistance is required.

BS9102 White and BS9103 Black are also available.

HEAT RESISTANCE COATINGS

Protective coatings solution specially formulated to withstand high temperature environments, while providing corrosion protection to the steel surface.

Nippon Paint 300 High Temperature Primer Nippon Paint 600 High Temperature Primer

A special solvent based paint suitable for priming interior & exterior ferrous surfaces subjected to high heat. It is recommended to overcoat the primer with the respective finish. (Maximum operating temperature for each product as indicated in the product name.)

Primer

Nippon Paint 300 High Temperature Finish Nippon Paint 600 High Temperature Finish

A special solvent based paint for interior & exterior ferrous surfaces subjected to high heat. Contains aluminium paste which gives excellent corrosion resistance. Must be used with their respective primer. (Maximum operating temperature for each product as indicated in the product name.)

Aluminium

White*

Red*

*Available for Nippon Paint 300 High Temperature Finish only

CHEMICAL RESISTANCE COATINGS

Protective coatings solutions that are specially formulated for severe chemical environments on steel and concrete including immersed services.

Nippon Paint CORCHEM PRIME

Two-component epoxy primer, which pigmented with zinc phosphate anti rust inhibitor. It is designed as anti-corrosion primer for vinyl ester system, on metal and concrete surfaces. It can be top-coated with most of the topcoat system, including acrylics, polyurethane and epoxy.

Nippon Paint CORCHEM VE

Build-up system based on vinyl ester resin, designed to fulfill requirement of high temperature, excellent corrosion and chemical resistance properties. Ideal for chemically stressed environment such as chemical tanks and wastewater treatment tank.

PROJECT REFERENCE

We are proud to be involved in the thousands of completed projects across Malaysia over the years. Here are some projects that used our coating solution to create their strong coat of reputation.
